

new additions

to our distinctive drapery hardware collection

The trend to larger diameter metal finials continues with the introduction of Tempest (998) and Iron Ball (632), sized for 1½" diameter poles. Available also to fit 1" diameter poles, the Tempest (997) has a clean contemporary look, well suited to the Antique Pewter (60) finish shown here. The ever-popular Iron Ball finial (631) is still available for 1" diameter poles. 2" flattened steel rings have been added to the collection. Additional finishes are available for all the items shown.
